

## Weekly Report - Sofia Nappi

March 13th - March 16th (4 days - end of week 1)

First 4 days residency were overall a great start for the creation of “Wabi-Sabi” as a full evening length work.

As the choreographer myself, I already finished creating movement and setting choreography for what I am envisioning to be the very final group section of my work, the Grand Finale.

First day I broke the ice by teaching lots of material to enter the “mood” of my creation and the following few days were a complete full immersion in the specificity of style with details, new transitions and clarifications for the dancers.

Creating so much material myself is a challenge that I embrace with so much fulfillment and passion, I am feeling extremely grateful for the opportunity to take advantage of such great space and environment.

I treasure that CC is the real nest of what “Wabi-Sabi” will be in its full potential.

Looking forward to keep riding the way of creation and inspiration in the next few weeks!
